Where the world builders take flight.

Partner brief · for German startups & companies

# Talent shortages, innovation pressure, and slow hiring in Germany.

## 109,000

unfilled IT positions in Germany (Bitkom 2025) - 85% report shortage, 79% expect it to worsen.

## 7.7 months

average time to fill a specialised IT role (Bitkom 2025).

## 42%

of German companies expect additional IT hiring demand because of AI.

## 1 in 4

IT hires in Germany already go to career changers - the pipeline is stretched.

THE OPPORTUNITY

# Highly capable Indian builder talent - curated, not crowdsourced.

## 2.55M

AI talent demand in India: 800k–850k today → 1.25M+ by 2026–27 (NITI Aayog citing NASSCOM).

## ~50%

supply is roughly 50% of current AI demand - the bottleneck is demonstrable skill, not raw graduate volume.

## \$5.1B

raised across 421 deals in Pune (2014–2025) - India's top emerging startup hub.

## 2,117

Global Capability Centres in India, employing 2.36M professionals (Zinnov-NASSCOM FY2026). Pune is an established GCC & startup hub.

# The window is open.

- 01 **Oct 2024 - 7th Indo-German IGC launched the Innovation & Technology Partnership Roadmap (AI, start-ups, semiconductors, quantum).**
- 02 Oct 2024 - DST–DAAD Joint Declaration of Intent on innovation, technology transfer & entrepreneurship signed at the IGC.
- 03 **Jun 2026 - first Indo-German InnoXchange delegation: incubator heads & deep-tech founders travel India → Baden-Württemberg (DST, DAAD/DWIH, SINE-IIT Bombay).**
- 04 SEPT Innovation Challenge 2026 shows German SMEs already use structured student collaboration for AI, sustainability and market-expansion problems.

WHAT IS HACKPUNE?

# A curated, German-owned challenge sprint for applied AI and agentic prototypes.

- **8 challenges, all German.** Every track is owned by a German startup or company - no toy tasks, no Indian company challenges.
- 160 curated builders. 40% students · 40% professionals · 20% open. Reviewed on GitHub, challenge-fit, AI relevance and mix.
- 24-hour AI-native build. Agentic AI, RAG/MCP-style workflows, cloud/tool access, mentors and judges per challenge.
- You keep the outputs. Working prototypes, GitHub/demo materials, and a clear recruiting signal from teams solving your problem.

# Why should we care? Real business value in one weekend.

## 01

### DELIVERABLES

Multiple working AI / agentic prototypes on your exact internal problem

GitHub repos + demo videos + short pitch decks from every team

Winner prototype + all submission materials

## 02
